1. Claims 1-6 remain for examination.

2. The text of those sections of Title 35, US Code not included in this action can be found in a prior Office Action.

3. Claims 1-6 are rejected under 35 USC § 103 as being unpatentable over Hauck et al., *The Chimaera Reconfigurable Functional Unit*, The 5th Annual IEEE Symposium on FPGAs for Custom Computing Machines, April 16-18, 1997, in view of DeHon, *Transit Note # 118 Notes on Coupling Processors with Reconfigurable Logic.*

Hauck et al. was cited as a prior art reference in paper number 8, mailed September 15, 2004. DeHon was cited as a prior art reference in paper number 20050524, mailed December 8, 2005.

4. The rejections are respectfully maintained and incorporated by reference as set forth in the last office action, paper number 20050524, mailed December 8, 2005.

5. Applicant's arguments filed March 8, 2006, paper number 20060308, have been fully considered but they are not deemed to be persuasive.

6. In the remarks, applicant argues in substance:

A. That: "DeHon relates to interfacing with standard microprocessors using reconfigurable logic. The standard microprocessor has a control bus, an address bus and a data bus. No such processor is present in Hauck. There is no teaching or suggestion in the references themselves of combining the teachings of the references in the manner suggested.

This is not found persuasive because applicant is arguing that a reason to combine must be found within the references. This argument is clearly in error, as a reason to combine is not required to be found within the references themselves:

The test of obviousness is:

> "whether the teachings of the prior art, taken as a whole, would have made obvious the claimed invention," *In re Gorman*, 933 F.2d at 986, 18 USPQ2d at 1888.

> Subject matter is unpatentable under section 103 if it "'would have been obvious . . . to a person having ordinary skill in the art.' While there must be some teaching, reason, suggestion, or motivation to combine existing elements to produce the claimed device, it is not necessary that the cited references or prior art specifically suggest making the combination." *In re Nilssen*, 851 F.2d

1401, 1403, 7 USPQ2d 1500, 1502 (Fed. Cir. 1988).

"Such suggestion or motivation to combine prior art teachings can derive solely from the existence of a teaching, which one of ordinary skill in the art would be presumed to know, and the use of that teaching to solve the same [or] similar problem which it addresses." *In re Wood*, 599 F.2d 1032, 1037, 202 USPQ 171, 174 (CCPA 1979).

"In sum, it is off the mark for litigants to argue, as many do, that an invention cannot be held to have been obvious unless a suggestion to combine prior art teachings is found *in* a specific reference."

Entire quote from *In re Oetiker*, 24 USPQ2d 1443 (CAFC 1992).

"A suggestion, teaching, or motivation to combine the relevant prior art teachings does not have to be found explicitly in the prior art, as the teaching, motivation, or suggestion may be implicit from the prior art as a whole, rather than expressly stated in the references. . . . The test for an implicit showing is what the combined teachings, knowledge of one of ordinary skill in the art, and the nature of the problem to be solved as a whole would have suggested to those of ordinary skill in the art." In re Kotzab, 217 F.3d 1365, 1370 (Fed. Cir. 2000)" In re Leonard R. Kahn (CAFC, 04-1616, 3/22/2006)

Accordingly, as shown above, the references need not expressly teach the combination as argued by applicant. In the present case, DeHon teaches that it is advantageous in computing systems to provide the ability to perform reconfigurable interfacing at input and output points from the system, including the abilitiy to reverse the relative order of bits at that interfacing point. As Hauck et al.'s output multiplexers O1 to O4 are "interfacing points" the teaching of DeHon that it is advantageous to provide reconfiguration capability at such a point is motivation enough to one of skill in the art to make the proposed combination.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR § 1.136(a). The practice of automatically extending the shortened statutory period an additional month upon the filing of a timely first response to a final rejection has been discontinued by the Office. See 1021 TMOG 35.

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED STATUTORY PERIOD, THEN THE SHORTENED STATUTORY PERIOD WILL EXPIRE ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE PURSUANT TO 37 CFR § 1.136(a) WILL BE CALCULATED FROM THE MAILING

DATE OF THE ADVISORY ACTION. IN NO EVENT WILL THE STATUTORY PERIOD FOR RESPONSE EXPIRE LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL ACTION.
